

Find the outcome – Worksheet

Let's see a different scenario!

Use the same tokens/numbers to complete the matrix below.

Agent A

		Cooperate	Argue	Ignore
Agent B	Cooperate			
	Argue			
	Ignore			

Tip:

This matrix is subjective and depends on how you could identify the best scenario for both agents.

Is there a right answer?

Exchange the puzzles that you have created with other teams and discuss any differences.

Tip:

You can create a pair board to help you count the probabilities of each one occurring.

Winner takes all?

What is the difference between this situation and the game?

Tip:

Consider if there are winners or losers when you complete both matrices.
